BSC. CSIT

Amrit Science Campus, TU

2021-Present

NEB +2

Reliance Int'l Academy

2019-2021

Score: 3.85

SEE

Manakamana SS

Year of Completion: 2018

Score: 3.90

PROFILE

I'm Bibhav, a Computer Science undergrad and an aspiring front-end developer who enjoys taking on new challenges and is always looking for ways to improve. I value critical thinking, punctuality and attention to detail. The journey from never writing a line of code to be able to self-learn web development has been a crazy one, and I'm still planning on learning more!

PROJECTS

Rest Countries Search

2023

A web app that integrates with Rest Countries API to pull a country data and display it. The app fulfills the user story below:

- I can see all countries from the API on the homepage.
- I can search for a country using an input field.
- I can filter countries by region.
- I can click on a country to see more detailed information on a separate page.
- I can click through to the border countries on the detail page.
- I can toggle the color scheme between light and dark mode.

Google Jobs Search

2023

What is the current jobs market? Let's make a job search app with Google Jobs API. The app fulfills the user story below:

- I can see a list of jobs in a city by default.
- I can search for jobs with a given keyword.
- I can search for jobs with a city name, zip code, or other location.
- I can select one option from at least 4 pre-defined options.
- I can search for a work-from-home jobs only.
- I can see a list of jobs with their logo, company name, location, and posted time.
- When I select a job, I can see job descriptions and how to apply.
- When I am on the job details page, I can go back to the search page.
